

Recognizing Love and Sexual Potential through Hand Analysis

Dr. Kanchana Kohombange

Ph.D., International Hand Analyzing Consultancy, Sri Lanka

Abstract: At the present time in our society the intense dissatisfaction is frustration in our sexual lives and difficulty in founding, keeping and satisfying romantic relationship with others. Not like earlier we all know about philosophy of sex and sexual technique but, many of us are unaware of our own sexual desires and need for love. Relationships are necessary for both our spiritual progress and psychological comfort. The main objectives of this research are discovering sexual desires and love potential of a person through hand analysis. Obtain both handprints of different kinds of people. Various aspects were observed under four main streams of palmistry. The results exposed that learning to understand ourselves and others sexually is essential for a good bond within relationship. With our growth our hands provided us with the basic introduction to sexual pleasure first ourselves and then with others. In conclusion I emphasize the fact that study of human hand helps us to learn about our basic sexual instincts and behaviors.

Keywords: Chirognomy, Chiromancy, Dermatoglyphics, Gestures.

1. INTRODUCTION

Human sexuality is made up of three components of vital force, pleasure and aggression. Vital force or sexual energy stands behind our desire to reproduce. It makes us to join together with a person of the opposite sex in order to create a new life. The pleasure is strongly connected to our biological instinct for reproduction. Since close physical contact with another person can be one of the most pleasurable human experiences, sexual interest is strictly allied to our ability to both give and receive pleasure. Aggression is closely interconnected to both vital force and pleasure. Aggression is part of our ability to assert ourselves in the world. In its primary manifestation it defends us from threats to our vital interests.

When we make love, our hands play a unique and exciting role. By hands we can touch our partner in ways that can produce supreme sensations of ecstasy (*a feeling or state of intensely beautiful bliss*). Careful study of human hand may help to recognize sexual desires and love potential.

There are four main sexual orientations. Those are Heterosexuality, Homosexuality, Bisexuality and Asexuality. While there are no clear marks and signs to show certain sexual orientation but considering hand as a whole can describe these orientations and sexual behaviors.

2. METHODOLOGY

Obtain handprints of various types of people who are having different types of sexual behaviors and desires. Taking prints was done by two types. First type was carried out using fingerprint ink CAT. NO. 231T (manufactured by SIRCHIE fingerprint labs, ink. 100 hunter place Youngsville, NC 27596 USA) Second type was taking clear high resolution photo of both hands. In addition it includes a recode of personal data. Examined the handprints and various aspects were observed under four main streams of palmistry. By contrast, results were compared with their sexual behaviors and emotions. Finally all the results classified.

3. RESULTS

Coming down from the long history use of human hand as a tool, symbol, weapon, organ for the blind and as a sign language to mute person can be seen. Artistic viewed hand gives meaning to the words spoken. Movement of the hands helps to emphasize the spoken word. We feel difficult to speak while our hands remain perfectly still. In legal practice, oaths are taken in court by use of hands. Also in any types of human communication process opens or closing by using their hands according to the situation. For salutation we raise our hands. Man takes a woman's hand in marriage.

When analyzing history of the human and their behavior of hands are highly important as essential weapon and measuring tool as well. Once we observe the development of the human evolution, they have used the hand for multifunctional reasons. Especially it has been used as a unit of measurement for volume, surface, width and length.

❖ Penis size is correlates with the length of middle finger. Interestingly penis size is varying with ethnicity. But here I found that when middle finger bent towards palm, length from that touch point to the tip of the middle finger shows the erect penis length accurately. **The study carried out into the hands of 96% of people was fulfilled in keeping with the mentioned proportions.**

❖ When we see middle finger on palm side position of middle finger is similar to position of erect penis. **The study carried out into the hands of 87% of people was fulfilled this position.**

Figure 01 – measuring erect penis size

❖ High 2D:4D finger ratio (short ring finger) on male hand was indicated female behaviors.

Heterosexual men had average lower digit ratio compared to heterosexual women. However homosexual men tend to have a 'feminized' digit ratio.

❖ Low 2D:4D finger ratio (long ring finger) on female hand was indicated male behaviors.

Heterosexual women had average high digit ratio compared to heterosexual men. However homosexual women tend to have a 'masculinized' digit ratio

❖ The hands of the majority of people who engaged in BDSM have abnormal features usually resembling those found on the hand of monkey. One must, however, be careful not to ascribe undue importance to one sign without consideration of the hand type as a whole. It is not uncommon to find one or even two atavistic signs in the hands of normal people.

Table 1 – signs describing different sexual behaviors

Dominant	Submissive	BDSM	Normal
Low set thumb	High set thumb	Low set thumb & High set thumb	Medium thumb
Long thumb	Short thumb	Abnormal or clubbed thumb slightly longer than average	Average thumb
Stiff fingers	Flexible fingers	Crooked fingers or stiff fingers or twisted fingers	Flexible fingers
Angle of the thumb is 90 degree	Angle of the thumb is 45 degree	Angle of the thumb less than 45 or 90 degree	Angle of the thumb is 45 degree
Prominent Venus mount	Average or absent Venus mount	Prominent or Exaggerated Venus mount	Average Venus mount
Ridge Pattern on Venus mount		Ridge Pattern or ridge disassociation on Venus mount or ridge malformation	Clear ridge pattern

An excessively full curve that cut across central vertical line used to divide the palm	Curved and shallow life line	An excessively full curve that cut across central vertical line used to divide the palm	Well rounded life line
High set little finger	Low set little finger	Isolated little finger Abnormal little finger	Average little finger
Little finger bent towards ring finger		Little finger bent towards ring finger	Little finger bent towards ring finger
			Good position of Mercury mount
Long thick index	Short index	Abnormal length of Index	Average index
Straight heart line or simian heart line / Suwon heart line		Short heart line or simian line / Suwon heart line	Long and curved heart line
High set or low set heart line	Average heart line Week heart line	High set or low set heart line	Average heart line Week heart line
Prominent mount of Mars	Average or absent mount of Mars	Prominent mount of Mars	Average mount of Mars
Reddish colour skin	Pink or Pale colour skin	Reddish colour skin	Pink or mixed colour skin
fleshy 3 rd phalanges	fleshy 3 rd phalanges	Extremely fleshy 3 rd phalanges 3 rd phalange is nonexistent	Long 1 st Phalanges Flat 3 rd phalanges
Separated life and head line at the beginning	Joint life and head line up to certain extend	Separated life and head line	Joint or Separated life and head line at the beginning
		Thick and rough hair on hand	
		Hard hand with coarse skin	
Normal temperature		Warm temperature	Cold temperature

Table 2 - signs describing different sexual orientations

Heterosexual	Homosexual	Bisexual	Asexual
Well rounded life line	Joined life and head line		Curved and shallow life line
Average finger length	Gay – short ring finger Lesbian – long ring finger Deficiency in length of Index		Deficiency in length of Index
Well-formed Thumb	Deformed thumb or A weak thumb		A weak thumb Strong Thumb
Normal little finger	Deformed , Isolated little finger		Deformed little finger Low set little finger
Long, clear & well-formed head line	Islanded head line		Straight or Islanded head line
Long, clear & well-formed heart line	Criss-cross patterned or short heart line		A weak or short heart line
Simian line	Simian line	Simian line	Simian line
Average Quadrangle	Narrow Quadrangle	Narrow Quadrangle or Broad Quadrangle	Broad Quadrangle
	Ring wearing on little finger	Ring wearing on ring finger that represents duplicity. (Ex. Turtle)	Ring wearing on middle finger A black ring wearing on the middle finger of the right hand
	Pattern on mount of Venus Missing C triradius	Missing C triradius	Missing C triradius
	Girdle across the base of fingers		
	All the fingertips bear whorl pattern	Double loop fingerprint pattern on thumb	
		Few lines on palm	

4. DISCUSSION

Chirognomy:

Average Venus mount with reddish skin with warm temperature denotes very sensual instincts and passionate nature. A well-developed mount of Venus denotes strong sexual energy with passionate nature. Over developed or exaggerate mount of Venus indicates a highly sexed nature. For them physical side of love and marriage is more important than any other. When the over developed mount of Venus with reddish and coarse skin indicates sexually aggressive and brutal love. These people become angry or even violent when they cannot satisfy their sexual desires. Under developed or absent mount of Venus indicates weak sexual drive and a cold nature. They think love and devotion to others quite boring and burden. Marriage to them would be for practical reasons. In this case if their partner has cool temperament then union can be happy one. Otherwise meaning of marriage is double income no sex.

Average or well-developed mount of Mercury indicates communication ability. They communicate well and able to relate in their relationships both verbally and sexually. Over developed mount is not good. These persons can be having a strong materialistic streak and a desire for easy money. They will exploit almost anyone who will offer them what they want. You can find them to be cheats, liars, thieves. Absent or flat mount of Mercury shows lack of ability to communicate especially in sexual relationships.

People with a normally developed upper mount of Mars have true courage, moral as well as physical. They have good powers of resistance and stamina. They are generous and forgiving lovers. An over developed upper mount of Mars shows bad temper. They rarely use physical force, but express their temper with irony and mental cruelty. Absent or flat upper mount denotes tend to be childish.

Lower mount of Mars is called the mount of active resistance. The average or well developed lower mount of Mars makes lover very exact in their ways, and always look able to take care of them. These lovers like to form lasting friendships and relationships. They are always passionate, steadfast and preserving lovers with strong pride and love of show. An over developed lower mount of mars indicates a lover with a very high tolerance to pain. They are violent, cruel and aggressive with sharp tongues and usually never afraid of taking risks. Flat mount of Mars denotes cowardly personality or born loser.

Short fingers tend to be impulsive in their love making and lack of patience. They are quick in action. They have inborn ability to understand and respond to your hidden sexual expectations. Long fingered lovers are in touch with their own feelings. They are uncomplaining, ardent and tender lovers. They want harmony in a loving relationship. Exceptionally long fingers comparing to palm shows desire of facts and details before making decisions. There needs to be "upper persuasion before the lower invasion". If the fingers are short compared to palm, the action may start on the way to the bedroom, with no time and energy wasted by talking about it. By contrast lots of women have long fingers and men have short fingers. Usually this incompatibility may the cause of problems rising between lovers.

Third phalange of the entire fingers denotes physically aware person who thrives on touching and especially enjoys the body's sensual pleasures. Luxury and the comfort of physical things are life's purpose. Pleasuring the body by both giving and receiving physical pleasure is a primary need. Food and hot sweaty activities, like a hot bath or sauna, are a great "turn on". Especially third phalange of little finger is take into consider. It is one of the areas that reveal sexuality most. When this area is extremely fleshy it indicates overflowing passion. Any vertical line on this phalange shows a supercharged nervous system wired and ready for action. Any horizontal line on this phalange shows that the brakes are on in such matters as physical passion.

I have found that the thumb is more affected in cases of venereal disease. The mount of Venus which is known as the third phalange of the thumb is connected with the vitality of the person and his passions. Thumb gets directly connected with the sex glands and it is natural that diseases of the sex glands should be reflected on the Thumb.

Average length of Thumb shows high morals, nonviolent character. They have flexibility and the ability to compromise. Lover having long Thumb is a leader, usually intellectual and will have the capacity to be successful. This position of Thumb always signifies strong personality, domineering in the relationship. They always have strong opinions. Lover having short Thumb indicates weak will and lack of self-confidence. They can be dominated by others and in a relationship they are very impressionable and narrow minded.

Clubbed Thumb shows unreasonable and violent temper. Lovers who have clubbed Thumb will react without logic. Carry out their plans regardless of any consequences.

A lover with low-set Thumb will have a strong love of independence and spontaneous in their sexual relationships. Medium set Thumb indicates well balanced lover. High set Thumb indicates trouble showing their intentions in a sexual relationship. They have weak mentality and tend to be secretive.

Figure 02 – position of Thumb

Figure 03 – Thumb angle

When the Thumb set at a 45 degree angle it represents good will power and common sense in dealing with life. Narrow angle denotes narrow minded prejudiced stubborn disposition. Wide angle shows strong will power and broad minded nature.

Average Index finger denotes ambitious. They will have great desire to succeed. They are natural leaders. They love with their mind and spirit and inspire love from others. They are good natured generous and forgiving lovers. If the Index finger is long than ring finger it shows dominant nature. They have high level of self-esteem. Their ego will sometimes demand several sexual conquests. If Index finger is unusually long then lover can be over tolerant sexuality. They attracted to extravagant things. Shorter Index finger shows submissive nature. They are lack of self-esteem and self-confidence and have fear of failure. They simply do not know how to enjoy life. They have dependent nature.

Middle finger represents solitude, wisdom, loneliness duty and restrictions. Long middle finger indicates unwilling lover. It shows extreme prudence. They can be lonely people. Very long middle finger shows strong sense of responsibility. Take life too seriously, which can cause them to become depressed and miserable. Short middle finger represents offended and gloomy disposition, especially dependent on others. In a relationship they think world is an evil place. This leads to a shortage of sexual satisfaction and frustrations.

Ring finger represents emotional and mental aspects of a person and how they express their feelings to others. Average length of ring finger indicates warm and sympathetic nature. Long Ring finger shows well balanced and self-confident. They are artistic, love beautiful things and have ability for success in the career of their choice. As lovers they can be very fascinating and take great pleasure in sharing. Their sexual energy is limitless and they make energetic sexual partners. Short Ring finger indicates lack of sexual energy and can be impatient in everything they do.

Average length of little finger represents sharp witted and have a wonderful sense of humor and great deal of energy and an insight to human nature. A long little finger shows ability to perceive and become aware their senses of the unseen. They are tune with their environment and make sensual lovers. Extra-long little finger indicates calculating and cunning personality. They want to earn money as quickly as possible. Short little finger shows lack of stability and concentration.

Crooked nature of any finger gives negative idea about the finger. Knotty fingers signify love of neatness and order in their relationships. They like to act slowly and thoughtfully. Smooth fingers shows quick mind and can instantly grasp the real nature of things. Beauty is very important in their surroundings when eating, sleeping and especially when making love. For example fragrance of the room must be very pleasant.

The stiff or straight fingers denotes stubborn and difficulty of adapting new ideas. Moderately flexible fingers denotes practical lover with lot of common sense. Fully flexible fingers indicate sentimental and impulsive nature.

Chiromancy:

Heart line denotes the information about the condition of the heart as an organ and blood related sickness as well as the nature of our emotions, feelings, sensitivity and capacity for love and affection, our moods, sex life and generosity towards people. Clear, deep, neither too broad nor too narrow and good clear color indicates balanced emotional character with healthy heart with good blood supply.

Suwon line indicates jealous, quick temper and blood related sickness coming down by inherit. They tend to be impractical, unable to understand difficulties arising from their relationships. By contrast when heart line exceptionally long it shows the opposite extreme of someone who surrenders themselves to service of others.

When heart line is too short it indicates emotionally cold and extremely selfish. They have very little appreciation of how others feel and are notably reserved in their emotional expression. This pattern compounded further when the heart line curves up towards mount of Saturn under the middle finger indicates this individual likes in the pleasure from sexual relationships and physical desires rather than love (despondency and pessimism).

The island on the heart line indicates emotional conflict or weakness of physical heart. Downwards or upwards lines from heart line suggests that their energy is grounded or earthed. Such lines are descriptive of sexual exchange and commonly indicate relationships.

Criss-cross patterned heart line has no clear flow to it and similarly denotes someone who has no constancy of emotional expression. It can indicate hatred of the opposite sex. Chained heart line describes someone who starts one relationship that ends through conflict.

Marriage lines can be seen under the little finger, on the mount of Mercury. These lines represent strong relationships over emotional and sexual nature. Low set marriage line denotes strong sex life that begins early. If the line sets in high it shows sex drive increase with age. Marriage line inclined towards heart line indicates failed relationship.

People who have girdles are in constant need of excitement and variety. Therefore traditionally Girdle of Venus describes as a line of strong sexual appetite.

A clear and short Girdle of Venus is a good marking of emotional alertness. It denotes a sense of balance in emotions and sexuality. A large and broken Girdle of Venus reveals disturbances in love or unsatisfied libido or sensuality at its worst. A star, island or spots on the Girdle of Venus especially if girdle of Venus is double or multiple, it denotes grave venereal disease.

Via lascivia or 'Line of Lustfulness' were found on the hands of people who had strong libido. With the other indications this line denotes degenerate behaviors, like inclined to sensuality and vulnerability to intoxication through alcohol and drugs. This line were found majority of prostitutes and porn stars.

Vertical lines beneath the Mercury finger represent children.

Shallow curved life line describes the seriousness and hardship experienced through lack of love. Childlessness is traditionally interconnected with this formation. In another way it describes forced austerity of a monk or nun who has negated sensory pleasures. This is usually revealed by an emaciated make-up.

Dermatoglyphics:

The loop of seriousness can be found approximately 20% of all hands. This indicates serious, responsible and often ambitious individual. People who have this loop take their relationships very seriously and they are not considering much fun or pleasure. In contrast to the loop of seriousness people who have the loop of humor tend to value comfort and pleasure. The presence of both loop of seriousness and a loop of humor on the same hand indicates that individual can have both serious approach to life and ability to enjoy life.

Malformation or broken skin ridges in the palm indicate some disease according to the location of the malformation. I had noticed that ridge malformations on Mount of Venus or mount of mercury always represents venereal diseases or physical or psychological problem related to sexual life of a person.

Ridge pattern on mount of Venus always exalted the quality of mount of Venus and make person sexually active person. With this formation ridge pattern on mount of Mars denotes violent sexual behaviors.

Gestures:**Figure 04 – Phallus symbol**

The middle finger turned sideways means the same exact thing as the traditional finger in the air. Sometimes teens do this because it's less obtrusive. Essentially they're hoping not to get caught flipping someone the bird. The middle finger is a **Phallus** symbol. It is a representation of an erect penis, typically symbolizing fertility or potency.

**Figure 05 – Asexual sign**

Many asexual people wear a black ring on their right middle finger. It helps as a signal to other asexual people and is careful enough that people won't think twice about it unless they already know what it means.

**Figure 06 – V sign**

This is not a peace sign. The innocent two fingers get naughty when you bring the tongue into play. If you hadn't already guessed, this one is suggestive of oral sex.

**Figure 07 – Physical only**

This hand sign shows that he cares more about the physical aspects of the relationship than the emotional. He puts no effort into the actual relationship.

**Figure 08 – Sign of whole sexual act**

Sex is not something you do. It's something you allow. Sex and intimacy are about being fully present with your sexual self, allowing pleasure, being connected to your body, to your heart and sometimes to a partner and the whole cosmos. Gesture shown on figure 08 denotes this idea very clearly.

Nails are colored with rainbow colors - This gesture represents the concept of transgender.

5. CONCLUSION

The results were tested and refined by my clients in the laboratory of real life. Clients exposed that sexual energy can be used to cultivate all other aspects of their relationship, including their physical health, emotional intimacy, and even spiritual growth.

Desire is not just the impulse that leads us to the bedroom; it is the pulse that keeps us alive. Sexual desire is related to the desire that motivates us in all other aspects of our life. People who are in touch with their sexual energy will have more energy to pursue their goals and dreams in the rest of their lives. Most of us are familiar with the shape and size of our hands since we see them every day, but very few of us are as familiar with the size and shape of our sexual anatomy.

You are free to fall and / or have sex with anyone you want. Don't let the society to decide your life. It is easy to say than doing it. But the bottom line it is true to you. Some people fall only for opposite sex or same sex or for both. Don't try to label yourself especially none of labels really fit for you. Be free to explore yourself and love and sex. Let it comes as it is and let it go.

Coming down from the long history of the world, palmistry has become a point of experiments, stretching like vistas of a colossal tree. In different civilizations of the world the palmists have tried to uplift the position of the palmistry by giving a prestigious position surpassing other various sciences. I wish that good humor and understanding should continue in this world as a living condition with the power of palmistry.

ACKNOWLEDGEMENTS

I sincerely acknowledge all my clients who shared their life stories as examples for this work.

Special thanks to my student Mr .M. W. J. D. Jayamanna who urged me to do this research.
